

Indzawo Optic Connect

1 32 beam splitter

1 32 beam splitter

Our expert technical staff will guide you through the many options we offer, ranging from custom split ratios, unique materials, and custom coatings to unusually large or small dimensions.

They may be concatenated (put in series) to create split ratios up to 1:32 (meaning one input can be split into a maximum of 32 fibers). Notably, FBT splitters are more cost-efficient than PLC splitters ...

Shop DigiKey's large in-stock selection of Beamsplitters. View inventory, pricing and order now for same day shipping!

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

Beam Splitters Features: • Rugged compact design • Broad wavelength range • Low insertion loss • High extinction ratio • Low return losses • Low Polarization Dependent Loss (PDL) • Low Wavelength ...

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

A beam splitter or beamsplitter is an optical component that is used for splitting an incident light beam in two directions. Beamsplitters are used to separate the light by a ratio of power between transmitted ...

The OCC1P 1:32 optical splitters comes with clips for mounting in the FOSC splice closures.

Explore our collection of optical cable splitters and PON splitters for sale. Optical beam splitters are used to split the fiber optic light evenly into several parts at specific ratios.
