

Add IP to the core switch

Overview

To assign an IP address to a switch, you will need to use the command line. If you are unfamiliar with terms in this document, check out Cisco Business: Glossary of New Terms. This means that you can buy a Cisco switch, plug in the right cables to connect various devices to the switch, power it on, and the switch will work properly. Setting up and managing a Ubiquiti switch through the UniFi Controller can dramatically simplify network management for businesses, home labs, and service providers.

Add IP to the core switch
