

After-sales service for waterproof cold aisle computer rooms

Overview

TRAX hot aisle / cold aisle data center curtains are the industry leading low cost containment solutions. Click the button bellow to request a quote or call us directly. Our aisle containment systems are designed to optimize energy use and enhance airflow management in data centers, both new and existing. Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing. TechnoGuard's Containment Solutions improve airflow efficiency delivered to IT equipment, improve energy efficiency and drive operational costs down. We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design challenges. WindChill Engineering launched in 2012, building on more than four decades of combined manufacturing expertise.

After-sales service for waterproof cold aisle computer rooms

WindChill Cabling

Whether implementing hot-aisle or cold-aisle containment, we are dedicated to delivering reliable, precisely fitted products. WindChill Engineering launched in 2012, building on more than four ...

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

Cool Shield is an industry-leading aisle containment system solutions company. Our experts are ready to customize a solution to fit your data center today!

Keep your data center cool and steady with AEPL's expert cold aisle containment solution. From site assessment to installation and maintenance, we provide everything.

By maintaining consistent, predictable temperatures, cold aisle containment minimizes thermal stress and reduces the risk of overheating, improving reliability and extending equipment lifespans.

Our modular containment solution and line of aisle airflow management products are specifically designed to block airflow, ensuring hot and cold aisle separation.

Our high-performance aisle containment and structural ceiling systems work within your data center design to optimize airflow, improve energy efficiency, and support scalable growth.

We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design challenges. Whether it's live environment or new construction, ...

Data center containment curtains by Trax deliver industry-leading hot and cold aisle containment curtain solutions. Request your free quote today.

Our high-performance aisle containment and structural ceiling systems work within your data center design to optimize airflow, improve energy ...

An aisle containment system is designed to be installed without the assistance of contractors or HVAC specialists. The components are organized into modular kits and come with assembly hardware for ...
