

B2 beam splitter

B2 beam splitter

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

Beam splitters are devices for splitting a laser beam into two or more beams. There are different types, including polarizing and non-polarizing versions.

Andover Corporation manufactures precision beamsplitters (standard, polarizing, non-polarizing, dichroic, cube, plate) for various applications. 1 Custom coatings & high-precision manufacturing.

It is made from a pair of precision high tolerance right angle prisms which are glued together. The ratio is stated for unpolarized light. A beamsplitter cube, tailored for ...

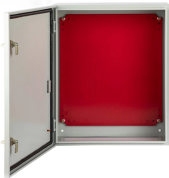

This document describes how Keysight's family of high performance beamsplitters offers industry-leading polarization and beam control with low wavefront distortion.

Beam splitting cubes, also known as beam splitters, are optical devices used to split a beam of light into two separate beams. These cubes typically consist of two right-angled prisms that are cemented ...

Due to their dielectric layer structure, dichroic beam splitters are sometimes also referred to as dielectric beam splitters. We offer specialised expertise in designing and manufacturing beam splitter coatings ...

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

ZYGO high precision beam splitters are custom made for critical applications including commercial space, medical, research, semiconductor, & photonics.

Excelitas offers precision fabrication and coating techniques that enable us to create high performance cube beamsplitters that provide a unique combination of superior optical performance and high laser ...

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

Beam splitters usually play a vital role in laser-based optical systems, so predictable and accurate performance is an absolute must. In both standard and custom models, Keysight beam split ...
