Black Tail Fiber Series

Overview

The Blacktail checks every box - lightweight design for backpackers who want a super comfortable tent after a long day on the trail, and excellent value for car campers looking for an easy to set up shelter with a small footprint. The Elite VL TD recurve was introduced in 1991 and quickly became the benchmark of our bow line. Burly recycled fabric means that you won't have to sacrifice. Blacktails are no exception. If someone bought one brand new and decided they wanted or needed to sell it within a short time, say a few weeks, they might get most of their money back but they are definitely going to lose money. With a global reputation as precision shooting instruments and formidable hunting weapons, Blacktail field performance is as good as it gets. Note: Take-down recurve bows in the Hunter, Elite VL, Sitka, T2 and Legacy Series offerings are available in either the 18" Elite or 16" Sitka riser configuration. The result of 25 years of bow making experience and knowledge, this bow was created especially for the discriminating, hardcore longbow hunter.

Black Tail Fiber Series

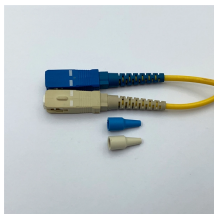

T2 Series bows (whether in the Elite or Sitka riser configurations) are built to the same design standards and superior craftsmanship that has become the trademark of the entire Blacktail line of custom bows.
