

C65N distribution box model

C65N distribution box model

The Schneider C65N 3P D63 is a robust and reliable circuit breaker designed to protect electrical distribution systems in industrial settings. Its compact design allows for easy installation and ...

Engineered with Schneider Electric's renowned reliability and safety standards, the C65N series provides precise overcurrent protection against short circuits and overloads, ensuring safe and ...

C 65N MCB is an all new high performance current limiting device with the ability to disconnect short circuits of up to 10kA. Which is the newest model in 21st century.

C65N-DC/2P-C6A is a compact protection device developed by Schneider for DC systems. Integrating overload protection, short-circuit protection, and circuit control functions, it is particularly suitable for ...

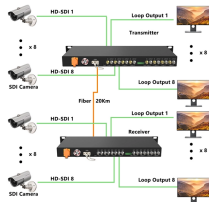

This circuit breaker is engineered with a compact design to fit easily into distribution boards and switchgear panels, making it a perfect solution for space-constrained installations.

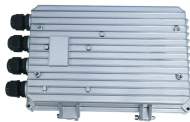

This product data sheet provides information on a C65N MCB, D curve, 14A, 230/400V, 13P, 6kA miniature circuit breaker. It is a 3-pole, 1-pole device for distribution networks rated at 14A and ...

The Schneider C65N 3P D63 is an essential component for any industrial electrical distribution panel. With its high-rated current capacity of 63A and a breaking capacity of up to 6kA, it ensures reliable ...

DC Circuit Protection - C65N-DC 2P DC miniature circuit breaker provides overload and short-circuit protection for DC distribution, solar PV strings, battery banks, RV and off-grid systems.

Free access C65N-DC 1P C20A (A9) datasheet, Package, pinout diagrams, and BOM tools.

C65N-DC miniature DC breaker switch 220V DC designed for photovoltaic combiner box installations and DC circuit control equipment with compact panel mounted structure.
