

Can a fiber optic cable be modified into a router

Overview

Q: Can I plug a fiber optic cable directly into a router?

A: Only if your router has an SFP port designed for fiber. Q: Do I need a special router for fiber optic internet?

A: While not all routers support fiber, many modern models. Because I can, I replaced our NTU (Network Termination Unit) that converts optical to electrical signals, and directly coupled the fiber into my MikroTik router. Here I summarise my findings for my own record and hopefully to help others. Among other things, I cover TX/RX wavelengths, fiber ends. There is the obvious deduction of getting another router or whatever the device is uses to turn the other optical cable into ethernet and wifi, but is this necessary?
