

Can the ground wire of the distribution box be replaced

Overview

Plastic boxes do not need ground wires, but receptacles do. Old, ungrounded switches should be. There, a high voltage is generated or received from a power plant to be routed through the utility company's electrical grid. This power will then be regulated and distributed to homes, sometimes after traveling thousands of miles or kilometers in electrical energy cables. The ground resistance between all system parts shall be < 0 . Can I run a separate green ground wire, or do I need to pull entirely new romex to upgrade two prong, ungrounded outlets?

I'm working on a house that due to age was wired with ungrounded romex.

Can the ground wire of the distribution box be replaced
