

# Configuration of ONU Optical Network Unit

## Product Catalog

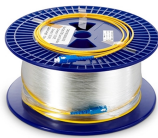

## Overview

Discover the steps to configure ONU and simplify WiFi network setup for seamless connectivity. In the realm of Fiber-to-the-Home (FTTH) and other FTTx architectures, the Optical Network Unit (ONU) is a critical piece of customer-premises equipment (CPE). Configuring an ONU allows it to establish communication with the OLT (Optical Line Terminal) and provide internet connectivity to. This article will use the FS OLT3610-08GP4S and the TA1910-4GVC-W ONU as examples to illustrate the connection and configuration process between FS OLT and ONU. It acts as a bridge between the optical fiber network and the end-user devices.
