

## Disable DHCP on the access switch

## Disable DHCP on the access switch

I am using an old router as a switch, and I disabled DHCP. But now I can't access the settings because it probably got a different IP from the main router. Is there a way to access the ...

Windows 10 offers multiple pathways to disable DHCP, ranging from graphical user interface (GUI) options to command-line tools, catering to diverse administrative preferences.

Learn how to enable or disable DHCP in Windows with step-by-step instructions for various versions, ensuring correct network settings for seamless connectivity.

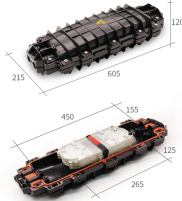

This post is meant to serve as a basic EXOS cheat sheet. It is by no means meant to be a configuration guide or thorough command reference. I will update this post periodically to add additional commands.

You can change the operation mode to Access point and there will be no DHCP server option. Otherwise, you can setup a smaller DHCP IP range on the Deco itself as a workaround.

Most would probably set it statically but it's totally up to what you want to do. To be clear this has nothing to do with assigning clients IP addresses. I have this same switch, and the answer ...

Do you have a dhcp serve on a specific port and want to block it from responding to dhcp requests? Can you not disable it?

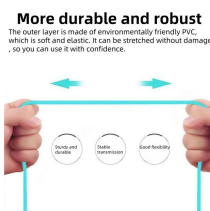

If DHCP is not Enabled on your Windows computer, then this post will show you how to enable or disable DHCP for Ethernet, Wi-Fi or Local Area ...
