

FC fiber optic interface hard drive

Overview

Fibre Channel hard disk drives (FC HDDs) are a type of server hard drive that uses the Fibre Channel interface to communicate with the host server. Fibre Channel is a high-speed network that is designed for data storage, and it offers much better performance than the SATA or SAS interfaces that are. Fibre Channel hard drives (the predecessors to SAS hard drives) provide robust speed and stable connectivity while maintaining the integrity of data in server farms and cloud computing data centers. R2F-J300FC - Hitachi Data Systems 300GB 10K RPM FC 3.5" HDD for all CX4's, CX3-80, -40, -40C, -. Shop Fibre Channel Desktop Internal Hard Drives on Newegg. Watch for amazing deals and get great pricing. Fibre Channel is primarily used to connect computer data storage to servers in storage area networks (SAN) in commercial data centers.
