

FMR is inside the optical module

Overview

The BMW FMR module controls interior lighting in E90/E92 models and commonly fails due to PCB degradation. This article explains diagnosis methods, repair options, and essential programming steps required for a successful replacement. Disclaimer: This content is provided by third-party contributors. The Cisco 400G QSFP-DD High-Power (Bright) Optical Module is an enhanced version of the existing QSFP-DD ZR+ Optical Module. The 400G QSFP-DD ULH optics are supported on even-numbered ports only. The supported port numbers are: 0, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34. When this module starts acting up, you might notice issues with your headlights, turn signals, or power windows. The FMR frequency (fr) in an optical mode is usually much higher than that in the corresponding acoustic mode for exchange coupled ferromagnet/.
