

Fiber Fusion Box and Spectrometer

Fiber Fusion Box and Spectrometer

Below you can see some samples of fiber assemblies widely used for spectroscopic applications.

Our compact, high-density, indoor Mass-Fusion Rack-Mount Splice Cabinets are perfect for data center interconnection applications.

These aluminum enclosures are designed for high-density splice storage, with emphasis on proper fiber management and versatility of cable port seals and cable tie-down features.

Our FTIR-FC is ideal for fibered applications such as reflection probes used for diffuse reflection measurements. The Arcoptix FTIR-FC can be equipped with both 4-stage thermo-electrically (TE) ...

A near-infrared spectrometer based on offset fused multimode fiber (MMF) is investigated in this study. The light spectrum is recovered by analyzing the speckle images when ...

Shinoh Fiber Communication Co., Ltd is a professional manufacturer of fiber optic fusion splicers. Besides, Shinoh could also supply other related test equipment, like palm OTDRs, power meters, ...

Leviton offers a full range of fusion fiber optic splicing solutions, including fiber splice modules in our popular HDX and SDX patching footprints. Fusion fiber splicing provides a permanent fusion ...

Our SM and double-clad fiber coupler offerings also include a selection of components ideal for OCT applications.

This article explores the development of a small, compact fiber-based spectrometer system designed to overcome the limitations of standard spectrometers, such as the high cost and restricted accessibility.
