

Fiber optic box relocation

Overview

Fibre optic cable relocation involves moving existing fibre optic installations to a new location. This process demands careful planning to maintain service continuity and optimal performance. In this guide, I'll walk you through the step-by-step process of moving your fiber phone line seamlessly, ensuring uninterrupted communication during your relocation. Why Move Your Fiber Phone Line?

Fiber-optic technology offers unparalleled speed and reliability over traditional (and now becoming). Let us know if you find downed or uncovered wires or cables in your area. Did you find drooping wires, downed lines, or AT&T equipment in a yard or on the street?

Let us know. The fiber line comes overhead from the pole to the side of the house and drops vertically along the wall where it meets an ATT junction box. Fiber takes specific tools. It'll be 20-30m to where the desktop will be from where the modem is right now.
