

Global Energy Internet Special Issue

Overview

The Global Energy Interconnection (GEI) Journal publishes original research on theories and developments as well practical applications on principles of large scale low carbon energy generation, transmission, distribution & storage technologies, global energy . The Global Energy Interconnection (GEI) Journal publishes original research on theories and developments as well practical applications on principles of large scale low carbon energy generation, transmission, distribution & storage technologies, global energy . The global transition toward low-carbon energy systems, driven by the “Dual Carbon” goals and the integration of large-scale renewables, has significantly increased the complexity of modern power systems. Submissions will be subject to an APC if accepted and published in the journal. You can read more about APCs and whether you may be eligible for waivers or discounts, through your institution, funder, or a country waiver.

Global Energy Internet Special Issue

Guest Editors initiate Special Issues by defining the scopes, drafting call-for-papers, and inviting submissions. To ensure rigorous assessment, all Special Issue submissions undergo the same peer ...

GEI is a clean energy-dominant, electric-centric modern energy system that is globally interconnected, jointly constructed and mutually beneficial to all. It is an important platform for large-scale ...

Special issues of Energy Internet highlight emerging topics within the field of engineering or pose interesting questions and offer new perspectives on an existing area of research.

The provision of low carbon energy to our society is a key issue at the heart of sustainable development of global energy supply. The Global Energy Interconnection (GEI) Journal publishes original research ...

Read the latest articles of Global Energy Interconnection at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature

The potential for renewable energy to make contributions to mitigating the impact of climate change is expected to increase significantly in the longer term.

Global Energy Interconnection established by Global Energy Interconnection Development and Cooperation Organization (GEIDCO), is professional and prospective scientific journal in energy and ...

“Advances in Artificial In-telligence in Energy Interconnection and Low-Carbon Power Systems”. We sincerely invite submissions from scholars worldwide. This Special Issue aims to bring together ...

This special issue aims to achieve two objectives: advancing theoretical models that define resilience thresholds in networked energy systems, and developing intelligent solutions through predictive ...

This Special Issue aims to bring together cutting-edge theoretical developments and practical engineering applications of AI in energy interconnection and low-carbon power systems, ...
