Explore Footmaxx orthotic modules designed for custom orthotic builds. Select components tailored to your patients' specific needs for optimal foot support and function.

A basic solid-ankle foot designed for indoor walking might run \$1,000 to \$3,000, while a carbon-fiber energy-return foot for active users falls in the \$5,000 to \$15,000 range.

Considering both the upfront surgical bills AND ensuing post-op care, the total cost of an ORIF ankle procedure easily ranges from \$15,000 to \$60,000+ in total.

The cost of a prosthetic leg below the knee varies from \$3,000 to \$24,000, depending on the brand, the type of carbon foot, and the features of the silicone liner chosen.

Ultimately, the cost of custom orthotics will depend on your individual needs and circumstances. It's important to talk to a qualified medical professional before buying orthotics.
