

## How to configure a router with a static IP address for fiber optic connections

### Overview

Login to your router — access the admin panel. Find DHCP reservation — look under "LAN", "DHCP", or "Address Reservation". This article contains example configurations you can use to help you set up your network with static IP addresses. Most routers provide a dynamic IP address by default, which means that this address can change every time the router is rebooted or connected to the network. Get information about your Internet connection type from your Internet Service Provider (ISP). It seems like they have little fiber hubs for 8 houses in a set, and those little hubs connect back to the main neighborhood box with an 8 or 10-strand cable, directly buried in the ground.

## How to configure a router with a static IP address for fiber optic con

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to ...
