

How to connect a switch with 4 10 Gigabit optical ports

Overview

Insert 4 10G SFP+ optical modules into the 10-Gbps SFP+ port of one switch in turn, then insert a 40G QSFP+ optical module into the 40-Gbps QSFP+ port of another switch, and finally use a branch fiber patch cord in the middle to make a connection. Other than entry level network switches, most of today's network switches include one or more GiBC (Gigabit Converter) or SFP (Small Form-factor Pluggable) slots. SFP modules insert into these slots and require two strands of fiber, typically duplex Using multi mode fiber (for runs under 1000. The 10/100/1000 Ethernet ports on switches use RJ-45 connectors and Ethernet pinouts. Generally connected with switches, fiber optic routers, fiber optic network cards, etc., it is used in 10G bps Ethernet and 8. 5G bps fiber channel systems.
