

How to use copper wire in junction box accessories

Overview

Ensure that each wire has about 3/4 inch of exposed copper. Insert the wires into the junction box, making sure to match the color-coded wires together. A junction box provides a necessary protective enclosure for all electrical wire splices and connections, which must never be left exposed within a wall or ceiling. Proper assembly inside this box is paramount because a poorly made splice can generate excessive heat due to high resistance, creating. Whether you're completing a repair or installing new fixtures, knowing how to connect electrical wires in a junction box is an essential part of any homeowner's skillset.
