An electrical panel box, also known as a breaker box or a distribution board, is a crucial component of any electrical system. It serves as a central hub for distributing electricity throughout a building, ensuring that power is delivered safely and efficiently to all the required locations. Inside the panel are circuit breakers or fuses that protect each circuit from overloads or short circuits. By having separate breakers, any electrical issues can be isolated without affecting the entire system. Label and connect. These three wires enter the meter box and then connect to the main panel. It sends power to different rooms and keeps things safe by shutting off power if there's a problem.
