

Huawei PoE Switch Company Network Setup

50KW modular power converter

Flexible Configuration

- Modular Design, Expanding as Required
- Small&Light, Wall Mounted
- Installed in Parallel for Expansion

Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

Reliable Protection

- Outdoor IP65 Design
- Sufficient Protection Functions Equipped

Overview

This document covers the basic setup requirements for a Huawei Ethernet Switch when using in conjunction with WPW AV over IP products. This guide explains how Huawei PoE switches enhance performance, improve energy efficiency, and integrate seamlessly with PoE access points and PoE Wi-Fi APs, helping enterprises achieve higher network ROI. The modern workplace is no longer confined to wired desktops. 1 Overview of PoE Definition Power over Ethernet (PoE) is a method of providing electrical power through Ethernet cables. Purpose As IP phones, network video surveillance, and wireless Ethernet networks are widely applied, power supply. This document describes the configurations of Device Management, including device status query, hardware management, Stack, SVF, PoE, OPS, energy-saving management, information center, fault management, NTP, synchronous ethernet, PTP. Users should be cautious when placing it in dusty or wet environments. Building on next-generation, high-performance hardware and the Huawei Versatile Routing Platform (VRP), the S5700-LI supports Advanced Hibernation Management (AHM).
