

Huawei switch Ethernet port replaced with optical port

Huawei switch Ethernet port replaced with optical port

In addition, the S5710-HI provides both optical and electrical ports for flexible access and supports PoE+. The flexible port combinations meet different bandwidth upgrading requirements and protect ...

After the switch has the V100R006SPH005 patch installed and a GE optical module connects to a 10GE optical port on the S6700, you can run the negotiation auto command to switch the port status to ...

The fibers and optical modules supported by Huawei switches are updating. For the latest information, visit or contact your local Huawei sales office.

Execute the command “combo enable fiber” in interface mode to switch to the optical interface; on the contrary, “undo combo enable fiber” switches to the default electrical interface state.

Learn how to validate Huawei CloudEngine transceiver compatibility, compare common optical modules, and troubleshoot real port issues with a practical checklist.
