

Installation of automatic doors in the cold aisle of the computer room

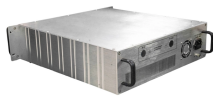

Overview

The Sliding Doors offer data centers aisle-end containment in just minutes and without the need for contract labor. The tool-less design allows for quick and easy installation, removal, and re-installation with exclusive Magswitch® technology — no drilling required. Acceleration containment systems are customized for the unique data hall environment and are designed to separate cold supply airflow from hot air coming out of equipment exhaust, while maintaining ease of access to critical equipment. WindChill Engineering launched in 2012, building on more than four decades of combined manufacturing expertise.

Installation of automatic doors in the cold aisle of the computer room

Professional Series Dual and Single Sliding Doors are made to improve performance and efficiency in the data center for both hot and cold aisle containment.

Cold aisle containment encloses the cold aisles to ensure only cold air is supplied to servers. This approach is normally used with in-row cooling and raised floors and is more common in retrofits. ...

Subzero Engineering has a variety of aisle end door styles and weights. Double, single, hinged, and sliding configurations make configuring your data center easy.

We can conduct the engineering assessment, recommend a solution, procure the materials, and provide an expert installation team.

We can design and engineer fully customized hot aisle containment components to help optimize your data center's cooling efficiency. We will work closely with your team to design a system that includes ...

Whether ceiling hung or integrated with aisle structure, our containment solutions are manufactured on our dedicated lines for quality, accountability, and fast lead-times.

We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design challenges. Whether it's live environment or new construction, ...

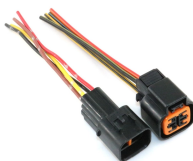

Today, STANLEY Access Technologies proudly manufactures, installs, and services sliding, swinging, folding, transit/metro door systems, and more.

Cool Shield™ products provide customers with versatile, turnkey aisle containment systems for new or existing critical spaces. Our offerings range from a single row in a server room to entire data center ...

A variety of door configurations are available to address distinct operational needs. In addition to our standard product line, we engineer and build bespoke solutions to overcome unique obstacles or ...

Sliding Doors offer data centers aisle-end containment in just minutes and without the need for contract labor. The one-tool design allows for quick and easy installation, removal, and re-installation with ...

The Cold Aisle Containment (CAC) approach encloses the cold aisle with ceiling panels above the aisle between adjoining racks and with doors at the end of the aisle.
