

## Method for binding the main line of the distribution box

### Overview

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. Binding Requirements: The wires should be bound with plastic. Connection method: Each switch takes a wire from the incoming point and connects it to the incoming end of the switch, or uses parallel connection to reduce the difficulty of wiring. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Practice good wiring: secure. The metal parts of raceways and/or enclosures containing service conductors must be bonded together [250. You can use standard locknuts to make mechanical connections to raceways, but you cannot use them. Whether upgrading an aging electrical panel or setting up your facility, this guide will walk you through the critical steps to installing an MCB Distribution Box safely.
