

Mns Low-voltage complete sets of equipment series

Overview

Our MNS series withdrawable low-voltage complete switchgear is a modular, multi-functional, and highly reliable power distribution and control device that complies with GB7251. 1, JB/T9661, and IEC439 standards. It is widely used in metallurgy, petrochemical, mining, and. MNS low voltage complete set switch devices is researched and developed according to the develop trend of Chinese low voltage switch cabinet by our company after improvement in electrical components and cabinet structure selection. Concept of modular system and digital technology are innovatively integrated into the MNS digital switchgear, so that the MNS® switchgear keeps up-to-dat witchgear for its global and local customers. Company Introduction:As leader of Chinese soft starter manufacturer we've formulated the Chinese national standard of soft starter industry. Big Pauer Electrical Technology Xiangyang Co.

Mns Low-voltage complete sets of equipment series

MNS is a series of modular and multiple functional low voltage power distribution cabinet. It is suitable for all low voltage system, power distribution and motor control system which requires high safety ...

GHS168 is our company absorbing foreign technology and developed the design of the low-voltage drawer-type switch equipment.

Our MNS series withdrawable low-voltage complete switchgear is a modular, multi-functional, and highly reliable power distribution and control device that complies with GB7251.1, ...

The main products include: PLC control cabinets, high and low voltage switch cabinets, box-type substations, distribution cabinets, and a series of automation control products, etc.

It has developed the first intelligent static phase advancer, liquid resistor starter, HV thermal resistor soft starter, liquid resistor speed regulator, voltage-reducing compensation soft start device, HV ...
