

National Standard Code for Cable Trays

Overview

NEMA Standard VE 2-2006 addresses shipping, handling, storing, and installing cable tray systems; it also provides information on cable tray maintenance and system modification. Compliance with these standards helps to ensure safe loading and the electrical continuity of cable tray. It is the first joint effort of NEMA and CSA International to put in one place standards for metal trays per both NEMA and CSA methods. Information on maintenance and system modification is also. These systems provide an efficient and adaptable solution for managing a wide range of cables, including power cables, control cables, Ethernet, and fiber optic lines. 305(a)(3), or comparable standards promulgated by States operating OSHA-approved State plans. This is a description of how to select, install, and support these metal or plastic frames, on which electrical wires are installed. Historically, the NEC has allowed cable trays, but has lacked specific guidelines for sizing conductors and using smaller. g on the web) is prohibited without copyright permission.

National Standard Code for Cable Trays

It provides rules for acceptable wiring methods that can be installed in cable trays, including conditions for use. It addresses uses permitted and not permitted for cable trays.

Cable tray system design shall comply with National Electrical Code® (NEC) Article 392, NEMA VE 1, and NEMA FG 1 and follow safe work practices as described in NFPA 70E.

NEMA Standard VE 2-2006 addresses shipping, handling, storing, and installing cable tray systems; it also provides information on cable tray maintenance and system modification.

In this installment of our Code Corner series, Ryan Mayfield focuses on the 2023 National Electrical Code (NEC) changes concerning cable trays, particularly section 690.31 (C).

It provides rules for acceptable wiring methods that can be ...
