

North Korea s stepped bridge structure

North Korea s stepped bridge structure

Meanwhile, on the North Korean side, construction is underway on the road that would connect to the bridge. It appears that the ground has been compacted, but the road has yet to be paved.

A new report has detailed the progress made over the past six months on the construction of the first road bridge to connect Russia with North Korea.

Construction began about a year later and BBC Verify has been using satellite imagery to track its progress. The crossing, known as the Khasan-Tumangang Bridge, has been built to handle ...

With the rapid construction of this bridge following the existing rail link, the only passage between North Korea and Russia, a sharp increase in economic, social, and military exchanges is anticipated.

The 850-meter-long bridge is being constructed near the existing Soviet-era “Friendship Bridge,” which has long served as a crucial transport and diplomatic link between the two nations. The new ...

Russia and North Korea have reached a major milestone as they finish the main structure of their first-ever road bridge. New satellite images show the two sides of the crossing over the ...

North Korea and Russia plan to begin installing large sections of a new \$100 million bridge across the Tumen River next month, a top Russian official in charge of bilateral operations ...

North Korea and Russia are cementing their alliance with the construction of their first-ever road bridge, marking a significant step in expanding bilateral ties. The bridge, spanning a...

Russia and North Korea on Wednesday began construction of their first road bridge, touting the project as a symbol of deepening ties.

On land, three bridge piers have been erected, and work continues on the approach ramp and bridge abutment. A satellite image collected on October 14, 2025, shows significant ...
