

Ordering Central Asia displacement-type optical attenuators

Overview

Shop DigiKey's large in-stock selection of Fiber Optic Attenuators. View inventory, pricing and order now for same day shipping! OZ Optics offers a broad range of both variable and fixed attenuators having key competitive advantages. All of our attenuators operate over the two standard wavelength bands, the C-Band and the L-Band. Our attenuators. With MEET OPTICS search you get direct access to our database of thousands of optical components from providers worldwide. Unlike simple beam blockers or shutters, attenuators are intended to maintain the temporal waveform and usually the mode. Motorized Variable Achromatic Attenuator 10MVAA is designed to control emission flux of lasers and incoherent monochromatic sources -both in broadband spectral (200÷2400 nm) and large dynamic range (>60dB) of attenuation. VIAVI offers the industry's most complete range of optical attenuators for installation and maintenance of singlemode and multimode. Fiber optic attenuators are devices used to reduce or monitor the power level of a fiber optic signal.

Ordering Central Asia displacement-type optical attenuators

Motorized Variable Achromatic Attenuator 10MVAA is designed to control ...

OPTCORE offers a complete line of low-cost variable in-line optical attenuators (VOA) with low back reflection. These variable optical attenuators allow the user to manually vary the attenuation of the ...

The MEMS attenuator design achieves highly repeatable optical attenuation over C and/or L bands through a thermally-actuated reflective vane that intercepts light.

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

Search for and compare optical components from manufacturers around the world, or for custom jobs we'll match you with an industry expert service provider.

This optical attenuators buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

DiCon's Precision Variable Attenuator operates by using a neutral density filter placed in the light path. This neutral density filter varies in attenuation along its length and a high precision stepper motor is ...
