

Panel-mounted gigabit and 100 megabit optical modules

Panel-mounted gigabit and 100 megabit optical modules

Data Sheet datasheet is intended to guide the user through the various options available when choosing an optic module for a given platform depending on the architecture.

Optical and copper models can be used on a wide variety of Cisco products and intermixed in combinations of 1000BASE-T, 1000BASE-SX, 1000BASE-LX/LH, 1000BASE-EX, 1000BASE-ZX, or ...

Choose the right 100M optical transceiver by checking compatibility, fiber type, wavelength, distance, data rate, connector, and reliability.

100M SFP PRODUCT FAMILY DESCRIPTION The 100BASE SFP modules allow a wide variety of 100 Megabit Ethernet connectivity options for enterprise, data center, and service provider applications. ...

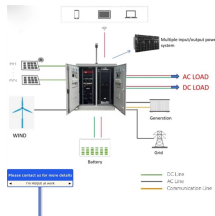

These modules are available from Extreme Networks. For current information about hardware support and the minimum required software for SFP modules, refer to the most recent version of the Extreme ...

This module contains 4-lane optical transmitter, 4-lane optical receiver and module management block including 2 wire serial inter-face. The optical signals are multiplexed to a single-mode fiber through ...

1. Understanding the Transceiver Types This Cabling Guide will discuss the different available fiber optic connectivity to work with 10G, 25G, 40G, 100G, 200G, 400G and 800G, and breakout options within ...

Our product portfolio includes fiber panels, advanced optical modules, passives, and a suite of accessories to meet your needs. Define your network architecture, choose the panel configuration, ...

Upgrade to 100G or 400G optics and save. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 ...
