

Power cables and optical fiber cables

Product parameters

Power cables and optical fiber cables

Power over fiber means the delivery of power for electronic devices via light in an optical fiber. Fiber optic cables consist of glass wires, each capable of transmitting digital data modulated into light waves.

Utilities build fiber optic networks in similar ways that others build them, aerial and underground, but they also mix aerial cables in their power distribution cables, sharing towers and poles.

We are a distributor of fiber optic cables, networking cables, ethernet cables, outdoor cables, power cords, extension cords and stock cabinets, racks and patch panels.
