Precision Cold Aisle Cabinets

Precision Cold Aisle Cabinets

We manufacture fully customized racks designed to support cold aisle solutions that align with your airflow requirements and energy efficiency goals. With NexGen's precision manufacturing, you'll have ...

Vertically integrated manufacturer of hot aisle containment, cold aisle containment, white space structure and conveyance solutions.

Traditional open aisle data centers use perimeter PAC (precision air conditioning) or CRAC (computer room air conditioning) units to channel cold air up through a raised floor void via grilles positioned in ...

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

Data Center Hot & Cold Aisle Containment
FEatures: Delivers controlled airflow, prevents hot/cold air mixing, and reduces cooling energy costs across the data center. Built for data centers, colocation ...

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to ...

Aisle containment is a cooling system that completely separates the cold supply airflow from the hot equipment exhaust air. This ultimately creates an even and consistent supply temperature to the ...

Cold Aisle drop away ceiling panels (clear or opaque) Class A rated, CA State Fire Marshal, UL & FM Global listed and approved Hot aisle to plenum light-weight cabinet supported vertical panels speed ...

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

An aisle containment system is a simple way to improve cooling efficiency in hot aisle/cold aisle rack configurations. Essentially creating a room within the aisle, ...

Optimize Your Data Center with GTK Engineering
Discover the ideal Hot Aisle/Cold Aisle containment strategy for your data center with GTK Engineering's comprehensive assessment and ...

High-performance Modular Data Center featuring Cold Aisle Containment, durable 2.0mm Cold Rolled Steel construction, and a robust 1100kg Static Payload for reliable server room solutions.

Cold Aisle Containment Precision Cooling for Peak Performance Cold aisle containment creates an enclosed corridor in front of server cabinets, ensuring that the coldest air goes directly into equipment ...

The aisle containment system is a modular rowbased thermal containment solution, which separates cold and hot data center air streams to and from equipment. It manages airflow at the source, ...
