

The core switch keeps restarting

Overview

The following table describes how the stack reacts to the crashing switch, depending on what role the switch had when the crash occurred. My entire network is run off of HP ProCurve 2910al-48G-PoE (J9148A) switches and everything has ran perfectly for 3 years. Last week we began experiences internet and network outages that would last approximately 1 minute. After startup completed, the switch 1 master rebooted again and again I turned off the switch 1 and I. Recently the server guy in my team has been proposing to reboot the 6509 core switches as a matter of practice in order to "clear stuff out". As of last night, core1 was up for two years, four months, and core2 has been up for seven years, five months. I see Support has already commented in the case notes the same. Although the switch software is highly reliable, a switch in the stack can experience a software issue that results in the crash and reboot of that switch. 01-24-2023 05:50 AM I need help with the switch C9200L 24-port PoE+ 4x10G, firmware cat9k_lite_iosxe_17_10_01_SPA. Any idea?

01-24-2023 07:50 AM Hi, Most likely, you.

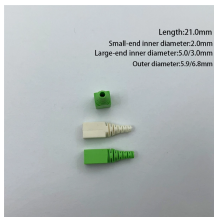

The core switch keeps restarting

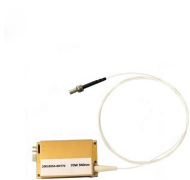

You could buy a 24-port Netgear ProSafe switch at a local OfficeMax, OfficeDepot, or Staples since your current switches are not in managed mode and use it to temporarily replace your ...

A: Unfortunately, for 30 hours, the switch does not want to restart itself. It is likely that there is an issue with the firmware on the switch. I would recommend checking for any available ...

Its obviously restarting for a reason, perhaps its protecting itself (and other switches from disaster) It might be a good idea to go around and check all wall RJ45 sockets for damage. Ensure ...

I have tracked down the culprit to be my MDF core switch that everything routes back through. It appears that it has been restarting itself and I am having trouble finding the cause.

Recently the server guy in my team has been proposing to reboot the 6509 core switches as a matter of practice in order to "clear stuff out". As of last night, core1 was up for two years, four months, and ...

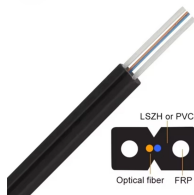

Hi everybody, I have a trouble with a switch (switch 1 master of 3 switches in one stack) that is rebooting continuously when i connect a machine on it. Historic: I rebooted the stack because of ...

If you hover over the Connectivity bar it will show you why the switch lost connection to the dashboard or rebooted. Otherwise if the logs don't give you any information about why the switch ...

Although the switch software is highly reliable, a switch in the stack can experience a software issue that results in the crash and reboot of that switch. This crash can happen in the software running on the ...

i found out that some of my switches restarted in the weekend "3560G-48PS and a WS-C4507R", i was asked to figure out why they restarted, i checked the temps, cpu and power and ...

Switch ran in an enclosure, booted up fine and ran for a while and then rebooted. One of the engineers monitored it for a while and found the switch had a temperature monitor and it was going over a ...
