

UK Micro-Module Flame Retardant

UK Micro-Module Flame Retardant

Under the ownership of Consolidated Timber Holdings, Falcon Panel Products and MBM Forest Products have been well established and respected suppliers to the UK timber industry for decades.

Factory applied, regulated treatments allow more time for escape in a fire situation, reducing surface spread of flame, heat and smoke release.

This higher specification of resin, used together with the inert glassfibre matting, provides one of the highest fire retardant specifications within the composite industry by reducing the spread of flame.

Identifies flame retardant substances manufactured and used in Great Britain, to assess their market size, properties, potential risks and regulatory status.

HR PROF is tested to Euro Class B and UK Class O for spread of flame for use on cladding, log cabins, garages, summer houses, staircases, bathrooms, saunas, pool enclosures etc both internally and ...

The UK Environment Agency has published a major flame retardant scoping review, identifying 124 substances currently used in Great Britain that ...

This has produced an updated dataset, documenting chemical properties, hazards and use information. Now that the UK has left the EU, there is an opportunity to reconsider chemical priorities....

This review is mainly focused on nanostructured flame-retardants and their types, mechanisms and applications of flame-retardant polymer composites, emphasizing recent ...

The UK Environment Agency has published a major flame retardant scoping review, identifying 124 substances currently used in Great Britain that may pose environmental or human ...

Abbey Polymers offers flame retardant polymers for enhanced safety in automotive, electronics, construction, & more. Reliable UK sourcing & quality assurance.

It evaluated 124 flame - retardant chemicals in the UK market, studying their environmental and health risks. The aim was to identify retardants used in Great Britain, looking at market size, ...
