

What is a pigtail fiber LC

Overview

LC pigtails are short fiber optic cables which have one connector on their one end and a bare fiber on the other. The connector type most commonly used is the LC connector, known for its compact size and ease of use. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a. A fiber pigtail is typically a fiber optic cable with one end factory pre-terminated fiber connector and the other exposed fiber.
