What is a terminal box SC

Overview

The fiber optic terminal box is a kind of fiber optic management products used to distribute and protect the optical fiber links in FTTH Network. SC and LC ports are important in Fiber Optic Termination Boxes. These connectors help send data smoothly by lowering signal loss. This terminal box is made of quality cold-rolled. 3C-LINK DIN Rail Fiber optic terminal box is available for the distribution and terminal connection for various kinds of optical fiber system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cores or pigtails are connected The DIN rail type termination. This 2 port indoor Wall Mounted Optical Fiber Distribution Box FTTH Termination Box is used for splicing and termination between indoor SC LC FC fiber optic cable and pigtails. This 2 port indoor Wall Mounted Optical Fiber Distribution. Indoor Wall Mounted, Single Door Optical Fiber Information Panel is ideal for end terminations of fiber optic runs in residential or commercial buildings. The LCFTB-108A-SC comes with 8 Simplex SC/UPC Coupler Ports installed with 8 Simplex SC/UPC Single mode Pigtails ready for splicing.
