

## What wires should be connected to the fiber optic cold connector

### Overview

In this guide, we'll walk you through the entire process of preparing fiber optic cable for splicing and termination to fiber connectors. We'll explore the necessary tools, safety precautions, and step-by-step procedures for cable connectors, mechanical and. We terminate fiber optic cable two ways - with connectors that can mate two fibers to create a temporary joint and/or connect the fiber to a piece of network gear or with splices which create a permanent joint between the two fibers. Unlike traditional fiber connectors that require epoxy and polishing, fast connectors use a mechanical splice to join the fibers.
