

Wiring diagram for the tracking light module

Wiring diagram for the tracking light module

Connect the track accordingly with the module according to your idea / design. Then cut the end of track to the desired length, then cover the end of the track with the end cap.

After the fixture adapter is installed, it can be used in a two circuit track to control which circuit is in use. Select Of, Circuit #1, or Circuit #2, by twisting the circuit selector knob (0-1-2).

Remove plastic end cap from the other track and install the other end of the ET110 in a similar manner making certain that polarity groove on the track sections are in line.
