

With fiber optic internet is a router unnecessary

Overview

A fiber wireless router is unnecessary for fiber Internet, but a traditional router will need an adapter to connect the optical network terminal to an Ethernet cable. A fiber Internet service like Google Fiber offers faster speeds, better reliability, and bigger bandwidths than. But here's the rub: If you plan to use a wireless router to connect to the internet over Wi-Fi, you're going to want one that can actually offer speeds that match your lightning-quick optical line. In other words, you'll need a newer router that can handle high speeds with Wi-Fi 7 to go along with. Unlike cable internet, which uses a modem to change signals, fiber internet uses an ONT. This device connects the fiber optic line to your home network. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Routers perform several key functions: Data Routing: It directs data between your devices and the internet.

With fiber optic internet is a router unnecessary
