

Xiaomi router cannot connect to fiber optic cable

Overview

This requires a standard Ethernet cable running from the ONT's designated LAN or Ethernet output port. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. Check compatibility: Before you begin, make sure your router supports fiber optic connection. Not all routers can connect directly to a fiber cable, so it is important to verify this information before continuing.

Xiaomi router cannot connect to fiber optic cable

The router may require a few minutes to set up the new connection. 7. Verify the connection: To make sure everything worked correctly, check the internet connection on your ...
